51 SIZING

Standard Sizing Qwick-Ship® sizes fit "average" body types with non-exceptional body proportions. Order by size or item number using the appropriate item specific size chart.

How to Measure Take measurements over clothing you normally wear during worship services. The diagrams below may help you take accurate measurements. If you need further assistance with measuring, please contact your local Murphy Robes representative. Select the size that most closely matches your measurements and order by style name and size code/sizing.

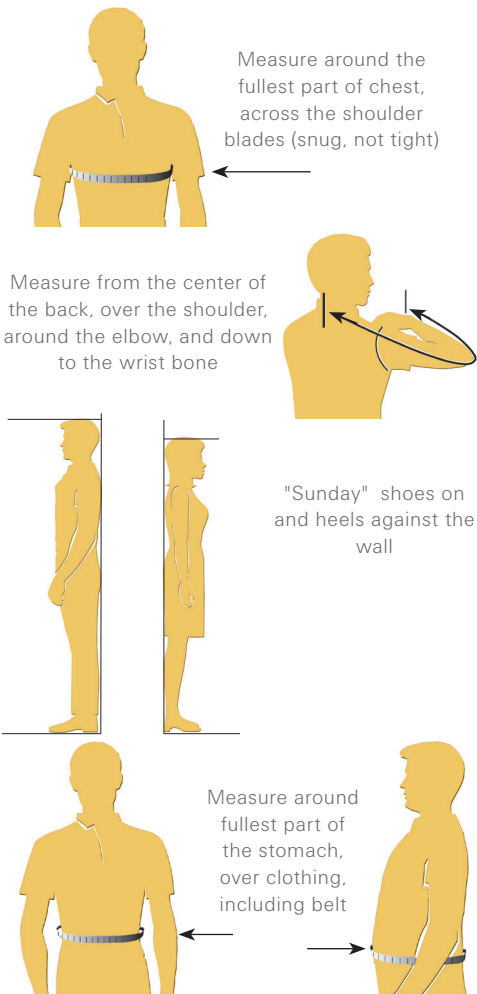

Available Custom Made Most Qwick-Ship® items may be ordered Custom Made in our available fabrics and colors. Allow a minimum of 8 weeks for manufacture and shipment of custom made items.

Chest: With arms relaxed, measure around the fullest part of the chest, under the arms and across shoulder blades. The tape should be snug but not tight. Keep tape parallel to the floor.

Sleeve: If you know your exact shirt sleeve length, use this size. To measure, bend elbow and measure from center of back at base of neck, over the shoulder, and around the elbow to the wrist bone, with lower arm parallel to the floor.

Height: Fasten a measuring chart or tape to the wall and stand straight against the wall chart, with "Sunday" shoes on and heels against the wall. The back of the head should touch the chart. Have someone place a ruler on top of your head, parallel to the floor. Your total height in shoes should be used as your height measurement.

Band Cinctures: Measure around the stomach where the cincture will be worn, over "Sunday" street clothing, including a belt. Add 4" to this measurement. Use this total measurement to determine band cincture size.
